

APPLYING PLAYFIELD INSERT MYLAR DISCS (DRY METHOD ONLY)

It may be difficult to see the clear cut discs on the backing paper. Hold to the light to see cut edges.

1. Ensure the play field insert surface is clean, free of wax, dust, and grease free.
2. Using tweezers lift the smallest disc first (7 mm) off the backing paper and apply in the centre of the sunken insert. Avoid touching the adhesive side of the decal with the fingers.
3. With slight pressure apply the adhesive vinyl disc to adhere to the centre of the sunken insert.
(You may want to use a small clean piece of paper between the disc and your fingers to ensure that no grease or dirt is deposited between the layers)
4. Follow steps 2 and 3 applying the next size disc moving to the largest disc (32mm).
Centre each disc on top of the other.
